Percentage of Retail Sales Covered by Retired Unbundled RECs³:				6%	0%	
¹ The eligible renewable percentage above does not reflect RPS compliance, which is determined using a different methodology.						
² Unspecified power is electricity that has been purchased through open market transactions and is not traceable to a specific generation source.						
³ Renewable energy credits (RECs) are tracking instruments issued for renewable generation. Unbundled renewable energy credits (RECs) represent renewable generation that was not delivered to serve retail sales. Unbundled RECs are not reflected in the power mix or GHG emissions intensities above.						
For specific information about this electricity portfolio, contact:				Rancho Mirage Energy Authority 1 (760) 578-6092

Rancho Mirage, CA 92270

The Power Content Label (PCL) is being provided as information only, no action is needed on your part.

You can think of the PCL as a "nutrition label" for electricity. The PCL provides information about the energy resources used to generate electricity that is put into the power grid. Just as a nutrition label provides information about the food you eat, the PCL provides information about your electricity sources.
